The 'right' side corresponds to the side where the stitches look like 'V's. This will be referred to as the 'V' side.

The 'wrong' side corresponds to the side where the stitches look like 'π's. This will be referred to as the 'π' side.

This amigurumi is made 'V' side out. This means that the finished body part must be turned inside out before stuffing.

S P E C I A L S T I T C H :

ScDec refers to a Single Crochet Decrease. To make this stitch virtually invisible when the amigurumi is 'V' side out, follow this well known method of only using the front loop:

Insert crochet hook into front loop of next stitch, yarn over and pull through.

Keep the loop on the hook.

Insert crochet hook into front loop of next stitch, yarn over and pull through.

There should be 3 loops on the hook. Yarn over and pull through all three loops on the hook.

GHOST

The Ghost is done entirely in spiral rounds.

Be sure to keep track of each row by placing a piece of yarn or a stitch marker on the last stitch of each row.

Using the long yarn ends from each of the legs, stitch the legs together using the back loops from all of the chain stitches (see picture to the right). Remember that the centre chain stitch of each leg should be sewn to the centre chain stitch of every other leg, as it is the centre of the bottom of the ghost. Before you have completed the sewing, stuff the ghost firmly.

Sew the pupil to each eye. Sew each eye to the head between Rows 9 and 15 with the 'V' side of each eye facing you. Darn in any remaining loose ends.
